Manage, store, preserve and deliver content and documents related to the organizational processes.

VAULTview

VAULTVIEW – ENTERPRISE CONTENT MANAGEMENT

VAULTview changes the landscape of Document Management by reducing overall costs, removing operational costs, and all other costs associated with a paper based business. With unlimited data storage, Vaultview allows companies to efficiently broaden their processes with instant access across multiple projects, departments, and locations simultaneously by users with roles, security and permissions down to the document level.

It's a robust, scalable document management system that delivers fast, secure access, improves business processes and supported 24/7/365. Full text OCR searchable documents and workflow functionality. View, Print and email instantly.

- Capture documents through both automated imports and scanning paper documents
- Provide a workflow tool to improve processes
- Retrieve records using a variety of search criteria
- Post comments for others to review

Lower costs, manage documents more effectively and allow organization's access to information anytime anywhere.
