

WHY YOU NEED ENTERPRISE CONTENT MANAGEMENT NOW

In light of recent events, many companies are looking for technology solutions that will allow employees to remotely store and retrieve documents in a centralized online repository that does not require dedicated servers, VPN access, or other hardware components that bog down digital transformation initiatives.

As a cutting edge technology company, Tronitech has helped many customers nationwide benefit from our extensive industry experience in Enterprise Content Management .

UNLOCK THE POWER OF VAULTVIEW

Integration

Tronitech's technology solutions can integrate VAULTview with the customer's existing lines of business systems.

Remote/Mobile Functionality

Support distributed and mobile teams anytime, anywhere, with document access, document storage, workflow management, and more:

- Initiate, continue, and complete document workflows
- Compatible with any modern web browser

Digital Workflows

VAULTview's workflow solutions are making the days of using paper-based workflows, email attachments, and Excel spreadsheets to track processes a thing of the past...

- AP invoice review approval
- Contract management

Centralized, Online Document Storage

Employees can access documents anywhere on any device and be assured that it is:

- Financially friendly
- No hassle solution – Easy design, build, & support all the time

Rapid Deployment

No need for hardware, dedicated servers, VPNs or BDR solutions...

- Microsoft Azure platform
- Multitenant architecture
- Scalable solution – add any users + storage as needed

Reporting & Compliance

VAULTview helps customers meet compliance mandates including HIPAA (Health Insurance Portability and Accountability Act) & more.
